Try before you buy

Download a free sample of any of our exam questions and answers

 Download Demo

- ✓ 24/7 customer support, Secure shopping site
- ✓ Free One year updates to match real exam scenarios
- ✓ If you failed your exam after buying our products we will refund the full amount back to you.

## Quality and Value

TestkingPDF Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all dumps.

## Tested and Approved

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

## Easy to Pass

If you prepare for the exams using our TestkingPDF testing engine, It is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

## Try Before Buy

TestkingPDF offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

**Exam** : **070-416**

**Title** : **Implementing Desktop  
Application Environments**

**Vendor** : **Microsoft**

**Version** : **DEMO**

NO.1 Your network contains an Active Directory domain named contoso.com.

The domain contains a server named Server1 that has the Remote Desktop Licensing role service installed.

Server1 fails.

You discover that all of the backups for Server1 are unavailable.

You deploy a new server named Server2. You install the Remote Desktop Licensing role service on Server2.

You need to rebuild the Remote Desktop Licensing (RD Licensing) database on Server2.

Which tool should you use?

- A. Server Manager
- B. The Add-RDLicense cmdlet
- C. The RD Licensing Diagnoser
- D. Remote Desktop Licensing Manager

**Answer:** D

NO.2 Your company has a main office and 10 branch offices. Each branch office connects to the main office by using a low-bandwidth WAN link.

All servers run Windows Server 2012. All client computers run Windows 8.

You plan to deploy 20 new line-of-business applications to all of the client computers.

You purchase 5,000 client licenses for the line-of-business applications.

You need to recommend an application distribution solution. The solution must be able to meet the following requirements: Download application installation files from a server in the local site. Generate reports that contain information about the installed applications. Generate administrative alerts when the number of installed applications exceeds the number of purchased licenses.

What should you include in the recommendation?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Applications published as RemoteApp programs
- B. Assigned applications by using Group Policy objects (GPOs)
- C. Applications deployed by using Microsoft System Center 2012 Configuration Manager
- D. Published applications by using Microsoft Application Virtualization (App-V) publishing servers

**Answer:** C

NO.3 You publish App3 as a RemoteApp program.

You need to configure App3 to meet the application requirements.

What should you do?

- A. On the RD Session Host servers, modify the Windows Installer RDS Compatibility setting. On client computers, modify the Remote Desktop Connection settings.
- B. From Remote Desktop Services, modify the properties of the App3 RemoteApp program. On the client computers, configure the RemoteApp and Desktop Connection feed.
- C. From Remote Desktop Services, modify the properties of the collection to which the App3 RemoteApp program is published. On the client computers, configure the RemoteApp and Desktop

Connection feed.

D. From Remote Desktop Services, modify the properties of the collection to which the App3 RemoteApp program is published. On client computers, modify the Remote Desktop Connection settings.

**Answer:** B

NO.4 Your network contains an Active Directory domain named contoso.com. All client computers run Windows 7.

You plan to upgrade all of the client computers to Windows 8.

You install the Microsoft Application Compatibility Toolkit (ACT) on a server named Server1.

You configure Server1 to host the Log Processing Service shared folder,

You need to recommend which permissions must be assigned to the Log Processing Service shared folder. The solution must provide the least amount of permissions to the shared folder.

Which permissions should you recommend assigning to the Everyone group on the shared folder? (Each correct answer presents part of the solution. Choose all that apply.)

- A. Write NTFS permissions
- B. Read NTFS permissions
- C. Change Share permissions
- D. Read NTFS permissions and Execute NTFS permissions
- E. Read Share permissions

**Answer:** A,C,E

Explanation:

Explanation/Reference:

<http://technet.microsoft.com/en-us/library/hh824812.aspx>

The Everyone group must have Change and Read permissions to the ACT LPS share.

The Everyone group must have Write access to the ACT LPS share.

NO.5 You need to install Office 2010 on virtual desktops that run Windows 8. The virtual desktops will be used by the research users in the Miami office. The solution must meet the technical requirements.

What should you do first?

- A. Run the App-V client setup and specify the /sharedcontentstoremode switch.
- B. Run the App-V client setup and specify the /migrationmode switch.
- C. Run the Office Customization Tool (OCT).
- D. Run the Office Migration Planning Manager (OMPM).

**Answer:** A

NO.6 You need to recommend a solution to distribute sessions to the RD Session Host servers. The solution must meet the technical requirements.

What should you recommend?

- A. On the RD Session Host servers, install and configure the Windows System Resource Manager feature.
- B. On the RD Connection Broker servers, configure the deployment properties.

C. On the RD Web Access servers, modify the Web.config file located in %Systemroot%\Web\RDWeb\Pages.

D. On the RD Connection Broker servers, configure the collection

**Answer: D**

NO.7 You need to recommend a solution for the HR users that meets the application requirements. What should you recommend?

A. Client Hyper-V

B. An App-V 5.0 client on an RD Session Host server

C. An App-V 5.0 client

D. A RemoteApp program on an RD Session Host server

**Answer: A**

Explanation:

App-V does not support 16bit applications.

RemoteApp is running from a 64bit OS; 16bit apps are not supported on a 64bit OS.

NO.8 Your network contains an Active Directory domain named contoso.com. The domain contains five servers. The servers are configured as shown in the following table.

Server name	Configuration
Server1	Remote Desktop Session Host (RD Session Host)
Server2	Remote Desktop Connection Broker (RD Connection Broker)
Server3	Remote Desktop Web Access (RD Web Access)
Server4	Microsoft Application Virtualization (App-V) publishing server
Server5	Microsoft Application Virtualization (App-V) management server

Servers Microsoft Application Virtualization (App-V) management server

You plan to deploy three App-V applications named App1, App2, and App3 by using RemoteApp publishing. Users will access App1, App2, and App3 from the RD Web Access site.

You need to ensure that the users can run App1, App2, and App3 by clicking links to the applications from the RD Web Access site.

On which server should you install the App-V client?

A. Server1

B. Server2

C. Server3

D. Server4

E. Server5

**Answer: A**

NO.9 You plan to deploy a Microsoft Application Virtualization (App-V) infrastructure. You need to recommend a configuration for the App-V management database. The solution must ensure that you can manage the App-V infrastructure if a server that has Microsoft SQL Server installed fails.

What should you recommend implementing?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Log shipping
- B. A SQL Server failover cluster
- C. Peer-to-peer replication
- D. Database mirroring

**Answer:** C

Explanation:

Explanation/Reference: <http://technet.microsoft.com/en-us/library/ms151196.aspx>

NO.10 Your network contains an Active Directory domain named contoso.com.

You need to recommend an application distribution strategy to meet the following requirements:

- Enable client computers to use different versions of the same application.
- Minimize the amount of hardware resources used on the client computers.

Which application distribution strategy should you recommend?

- A. Install the applications on Remote Desktop Services (RDS) servers, and then publish the applications as RemoteApp programs.
- B. Create a Windows Installer package for each application, and then deploy the packages by using a Group Policy object (GPO).
- C. Create a Windows Installer package for each application, and then deploy the packages by using Microsoft System Center 2012 Configuration Manager.
- D. Sequence the applications by using the Microsoft Application Virtualization (App-V) Sequencer, and then deploy the applications by using App-V streaming.

**Answer:** A

NO.11 Your company has a main office and a branch office. The main office is located in New York. The branch office is located in Toronto. The offices connect to each other by using a slow WAN link. The network contains an Active Directory domain named contoso.com. The domain contains servers that run Windows Server 2012 and client computers that run Windows 8.

All users have several third-party applications installed. The third-party applications are updated frequently by their manufacturers.

You need to recommend an application management solution that meets the following requirements:

- If the installation of an application update fails, the installation must restart automatically.
- Administrators must be able to generate reports that contain a list of all the failed installations of application updates.

Which application management solution should you recommend?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Deploy pooled virtual desktops by using a Virtual Desktop Infrastructure (VDI).
- B. Assign applications and updates by using Group Policy.
- C. Deploy packages by using Microsoft System Center 2012 Configuration Manager.
- D. Sequence applications by using Microsoft Application Virtualization (App-V) streaming.

**Answer:** C

NO.12 Your network contains a Virtual Desktop Infrastructure (VDI). All users access applications by using their virtual desktop. All virtual desktops run Windows 8.

You have a test environment that contains four computers. The computers are configured as shown in the following table.

Computer name	Configuration
Server1	Microsoft Application Virtualization (App-V) management server
Client1	Physical computer that runs Windows 8
Server2	Microsoft Application Virtualization (App-V) publishing server
Client2	Virtual machine that runs Windows 8

You plan to sequence 15 applications that will be deployed to the virtual desktops.

You need to identify which computers must be used to run the App-V Sequencer.

Which computer should you identify? More than one answer choice may achieve the goal.

Select the BEST answer.

- A. Server1
- B. Client1
- C. Server2
- D. Client2

**Answer:** D
